Notice of Security Breach

Dear [REDACTED]

We are writing to inform you of a security incident involving Greenbaum Rowe Smith and Davis LLP ("Greenbaum") that may have affected the privacy of some of your personal information. Greenbaum is a law firm which represents Hackensack Meridian Health. We want you to understand what happened and the steps we have taken to address this issue. Although we have no reason to believe that any misuse of this information has occurred or will occur, as a precaution, we are providing information about steps you can take to help protect your personal information.

What Happened

Greenbaum provides legal advice and counseling to Hackensack Meridian Health. In connection with its representation, Greenbaum, under appropriate legal, contractual and consent laws, has access to certain patient information held by Hackensack Meridian Health. On November 27, 2025, Greenbaum personnel discovered unauthorized access to its systems via a compromised user account. Upon discovery, Greenbaum immediately took steps to contain the intrusion and launched a comprehensive investigation with the assistance of external cybersecurity experts to determine the cause and scope of the incident. Greenbaum also took immediate measures to secure its environment, including password resets, replacing compromised machines, and notifying law enforcement.

Greenbaum's investigation ultimately determined that during this incident, which occurred between November 25, 2025 and November 27, 2025, certain information was acquired by an unauthorized third party from Greenbaum's systems. Greenbaum undertook an extensive analysis of the affected information to determine whether individually identifying data may have been involved, which took several months. On April 15, 2026, Greenbaum identified the protected health information of certain individuals in the affected data that was acquired by the unauthorized third party. This review required a detailed analysis of affected files to identify individuals whose information may have been involved.

What Information Was Involved

Based on our investigation, it was determined that some of your personal information was in the affected files. This information included your name, and one or more of the following: ID, DOB, Medical Information. While we believe any risk of harm is unlikely because there is no evidence that the information was published or misused, we are notifying you in accordance with applicable regulations.
